

Introductory Rust 2026 - Lab 6: Async with Tokio

Lukáš Hozda

Winter 2026/27

Lab Goals

1. Build and run small async programs with Tokio.
2. Use async tasks, channels, and timeout handling.
3. Prepare for homework pair I6.

Exercises

1. Spawn multiple async workers and gather results.
2. Add timeout wrapper around simulated async operation.
3. Implement retry helper with bounded attempts.
