Introductory Rust 2026 - Lab 2: Enums and Pattern Matching

Lukáš Hozda

Winter 2026/27

Lab Goals

1. Model finite state with enums.
2. Use exhaustive matching for command processing.
3. Prepare for homework pair I2.

Exercises

1. Build enum-based command parser ('add', 'sub', 'print').
2. Handle parse failures with 'Result'.
3. Convert nested 'match' into helper functions with clear error types.
